

Your Trusted Expert for Enterprise AI

Enhance Your AI Journey, from Data to Value

Expert.ai delivers proven enterprise AI solutions driving measurable business value. Headquartered in Italy and listed on the Euronext Growth Milan (EXAI:IM), we operate globally across Europe and North America with offices and dedicated AI Labs driving innovation.

**Turn insights into impact
with AI you can trust.
Boost performance, reduce risk
and scale AI initiatives with confidence.**

Experts in AI adoption

Hybrid AI, tailored AI solutions, unique expertise and delivery – our core competencies help you stay ahead of the competition and accelerate your AI adoption. With 30+ years of technology and industry experience, a highly talented Team of AI experts and a proven track record of delivering successful implementations, we are here to ensure smooth implementation, sustained growth and business impact.

Why our customers love working with us

Our customer-first approach is the foundation of our business. We continuously advance AI solutions, innovating business processes across vertical markets, and combining state-of-the-art technologies to unlock the full potential of AI.

Our enterprise AI solutions are mature, field tested and deployed across multiple industries to generate real, measurable impact.

What can AI do for your business?

We identify the most effective solution based on your industry, your goals and the specific requirements of your business.

Thanks to our open, innovation-ready architecture, we easily integrate new technologies as AI continues to evolve. Whether it's knowledge-driven Neuro-symbolic AI, Machine Learning, LLMs, Generative AI or Agentic AI, we combine best-in-class technologies with proprietary ones to help you solve real-world problems and achieve your goals faster.

Banking & Financial Services

Management of regulatory compliance, monitoring of risks and financial crimes associated with customers, streamlining operations, assisting internal staff and improving interactions with customers

Pharma & Life Sciences

Monitoring of resources related to clinical studies, strengthening research and development activities, greater effectiveness in the quality of care and support for the analysis and prevention of operational risks

Industrial

With a focus on manufacturing – management of third-party and ESG compliance, support for technical assistance activities, greater efficiency in production and in customer assistance

Insurance

Automation of core processes to increase the capacity of work teams, improve risk analysis, accelerate coverage determination and perform faster preliminary analyses in claims management

Public Sector & Intelligence

Innovation at the heart of operational activities but also of the user/citizen experience with efficient, transparent and scalable digital services

Information Services

Optimizing content creation and enrichment processes by improving workflows and manual activities

Your success shapes our AI standard

Some of the world's largest organizations trust us as their AI partner. We leverage decades of experience across a wide range of industries to continually refine our enterprise AI solutions, ensuring every project benefits from proven expertise.

As AI experts, we guide you at every step of your AI adoption journey—strategically, reliably, pragmatically. From identifying the best solution to seamless implementation, our mission is clear: to create lasting value by supporting your growth and helping you reach your goals.

EidenAI Suite:

Enterprise AI solutions designed for your needs, your industry

EidenAI Suite is our suite of complete, ready-to-use and tailor-made solutions for your industry. By setting a new standard for tackling even the most complex AI adoption challenges, EidenAI Suite helps you move beyond data to transform human and AI potential, creating a strategic asset that drives real value.

Teams need the flexibility of a Hybrid AI approach

At expert.ai, our Hybrid AI approach sets us apart. Our strength lies in our ability to combine the potential of different technologies to drive AI adoption in a way that is both strategic and practical. We don't just offer the most advanced AI technologies, we provide a proven, effective methodology to guide organizations through their digital transformation journey with artificial intelligence.

Every organization is unique – so are the challenges it faces

According to our Hybrid AI approach, EidenAI Suite integrates the most advanced technologies – from Neuro-symbolic AI to Large Language Models, from Generative AI to Agentic AI – in a flexible, modular suite designed to drive immediate business impact.

Eidénai, from Ancient Greek, means "to know, to understand". In our vision, AI not only solves problems, but transforms data into accessible knowledge. Starting from a deep understanding of your industry, EidenAI Suite helps you create an ecosystem where innovation, expertise and technology converge to drive meaningful value.

Let's drive your AI adoption journey... together.
